Portfolio: <https://acromarti01.github.io/portfolio-repo/>

Computer Science Engineering graduate who currently has sights set on a full-time web development position. Skills in HTML5, CSS, JavaScript, jQuery, Bootstrap and SQL offering a strong foundation in application development and programming principles with hands-on-experience in testing and debugging. Successful working in both team and self-directed settings with experience in project facilitating and resolving project issues.

TECHNICAL SKILLS:

Programs: Visual Studio Code

Languages: HTML5, CSS, JavaScript

Libraries: jQuery, Bootstrap

Databases: SQL Server

Other: APIs, JSON, AJAX, Node.js, the command line

PROJECTS/APPLICATIONS:

Small-Talk Generator

- GitHub: <https://github.com/avidrunner87/small-talk.git>
- Deployed Project: <https://avidrunner87.github.io/small-talk>
- Summary: Design app that allows user to search for trending topics in a location for team discussion
- Role: Research APIs and pulled data to develop widgets that display location's trending topics
- Tools: HTML5, Materialize, jQuery, Day.js,

Code Quiz

- GitHub: <https://github.com/acromarti01/code-quiz-repo.git>
- Deployed App: <https://acromarti01.github.io/code-quiz-repo>
- Summary: Design quiz with JavaScript fundamental coding questions
- Role: Develop user interface and persist user's high score information
- Tools: HTML5, JavaScript, LocalStorage

Work Day Scheduler

- GitHub: <https://github.com/acromarti01/work-day-scheduler-repo.git>
- Deployed App: <https://acromarti01.github.io/work-day-scheduler-repo/>
- Summary: Design calendar app that allows user to save events every hour from 9am-5pm
- Role: Develop functionality to color code each timeblock indicating past, present or future and persist the event data in each block
- Tools: JavaScript, jQuery, Moment.js, LocalStorage, HTML5

Weather Dashboard

- GitHub: <https://github.com/acromarti01/weather-dashboard-repo.git>
- Deployed App: <https://acromarti01.github.io/weather-dashboard-repo/>
- Summary: Design dashboard that display weather data for six days from a selected location
- Role: Pulled data from OpenWeatherMap API to create data tables of weather information
- Tools: OpenWeatherMap API, jQuery, Moment.js, LocalStorage, HTML5
